

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

By The Name of Allah
Ar-Rahman, Ar-Rahim

*More About
Genetically Changed and Us*

Serie-5

*Prepared and presented by
A. Yahya Yunus*

In these slide series, I want to share some other additional points about gcs (genetically changed) in Sa Allah (if God Wills).
By these items; to be able to be more carefull about the issue and to be able to deal better in Sa Allah

As, I tried to warn people that it is haram (prohibited) in islam as it is being the devils' to order to try to change the Creation *(referring to the ayat from Surah An-Nisa)*

Than, we are trying to get away as much as possible and even to prevent it from spreading to all the world.

And, surely, we should not put it into our mouths.

But as the threat not very openly recognisable all the times, it is on us to warn people about the danger and how to avoid and prevent.

As we are keeping in mind that gcs was being sold without a warning on package and as we could reasonable assume that it had spread shemingly to in the world, than it is time to act wise and act accordingly efforting.

As a first preventive measure for your own meal, lean on organic foods.

Then, if the food was labeled as non-GMO, then OK it could be more trustworthy.

Then, what is on the open market, especially if you do not have any choice but to select from such markets.

Then, here are some tips you could be careful about:

Do you observe the fruit (for example):

Has the same shape and taste as you knew it from your childhood and/or how it was looking more than 20-30.. years ago .. ?

Has seeds as it was supposed to have ? (for the ones with seeds)

Does it have unusual traits ? (like not decaying for even months' times)

Again, does it have unusual traits like being really bigger, having different kinda peels, unusual structure (*except from the conventional differences as the oldies got used to long times before*) .. ?

Is it the fruit of it is season ! ?

IF YOU HAVE ANY NEGATIVE ANSWER TO THE ANY SUCH QUESTIONS MENTIONED, THAN YOU HAVE A REALLY GOOD / OR ENOUGH REASON TO BELEIVE THAT IT COULD BE A GC AND YOU MAY TRY EVEN NOT TO TRY TO TASTE IT BUT TO TERMINATE AND NOT TO BUY AGAIN.

Than, what can we trust.

Than I thought I might try to share my menu with you as it could be a supplement and aid to help you to prevent from the filth.

* Actually, I could not spend much time about to issue to investigate. Moreover, what I investigated were burnt somehow. My phone recordings with many company people (also some including many clues) for hours' long conversation in my cellular phone was burnt.

Although I very scarcely got mail, you might still perhaps try to reach me for the informing.

It seems you may think more positive about the garden(s) you knew of their fruits etc. If you know its foods are safe, and close to such a place with a legal reach; than you are really in much grace and to gratefull to Allah / God ..

But if you really got stuck; maybe some plants could that were less commercialised may be in better possible condition to be a candidate of being more naturel.

Here is a view from a dish of mine I got more used to and which is undoubtedly much better than any time in my life.
Thanks to ALLAH, The Rab(Lord) of the worlds.

Here is another view from a dish of mine
Thanks to ALLAH, Who Tought me all these

We hope that Allah Protects the clean food supplies from the reach of the evil hands.

Surely, He is The Most Gracefull, Most Merciful
