

INS & OUTS

A. Yahya Yunus

31.07.2008

www.yahyayunus.net

*This presentation includes some recommendations
They are not obligations.
But, sometimes they could really be an obligation .
Why not to do the better
while it is there*

INS

- I prefer public transportation.

- I never leave driving my car

OUTS

INS

-Guys, is the back seats full?

-I can commute only by my car.

OUTS

INS

*-Just wait a minute.
I filled the old bottles at home.
Let's drink them.*

*-I got very tired. I'm thirsty.
Come on! Let's take a pet
bottle of water.*

OUTS

*-No need to. I have
already put all the stuff in
my bag (that I brought).
Let's go.*

-Is there a huge pochette? .

OUTS

*-No, Haven't you seen?
I decorated them on the
shelf as spice containers.
How nice seeming they are.*

-Have you thrown the jars?

OUTS

-I collect them in order to give a local collector. Even if I couldn't do it, I separate them so that the possible other collectors might get easier at the waste mountain..

-I haven't seen such a man like you. Does one collect these plastics at home like you.?

-No, they are rechargeable cells. Let me exchange them with the substitute cells.

-Remote controllers cells are out of charge. Let's take new ones.

OUTS

-No, I seperated them. If I got the way, there is a collector to give them. I reserve them for that. Because, the battery cells are very dangerous to environment.

-Throw those old cells to dust bin.

OUTS

-If there isn't an economical energy one, do not take it. Ins Allah, I might find an economical light bulb later.

-the light bulb has burned. Go to take a new one from the market.

OUTS

*-Nay, I think it is because
your dress is thin. You rather
take that sweater, than you
might overcome that.*

*-Today, it is a little cold.
Let's turn on the radiator.*

OUTS

-No. Rather we open the windows. Than we can even breath a fresh air and better protect the environment.

-Today, it is hot. Let's turn on the air conditioner. .

OUTS

-I conserve water and I'm sensitive about water resources and environment. Whenever I need to take a shower, than I might do it.

-I frequently take showers

OUTS

-Don't do that again. First put the container below, than open it. I'm to use that water tomorrow.

-I opened the tap but the hot water still did not come.

OUTS

INS

-A cool and short shower could be very good. On the other hand, I do not need to burn my skin under that hot water.

-The shower's water should be very hot....

OUTS

From a Dreaming of a better world's history lecture:

-Once upon a time, some people were spending the resources of Earth excessively

-Let me go to the hamam.

(or)

-Let me go to the sauna.

Dreaming from a better world's history lecture:

Lesson two:

-They finally understood that they had to leave filling out pools with the clean water they need. And learnt that they had to conserve and protect the environment.

-Why hasn't my pool been filled? How can I swim in this 10 day-old water?

RATHER YOU NOT TRY TO PRINT OUT THIS SLIDE SHOW.

IT MIGHT BE A BIT WASTE OF PAPER & TONER OR INK RESOURCES.

THIS DOCUMENT HASN'T BEEN PREPARED FOR THAT STUFF

RATHER YOU MIGHT TAKE NOTES IF YOU NEED TO.

SO, TRY TO THINK WISER IF YOU ARE TO PRINT SOMETHING. (WHITE BACKGROUND, SMALLER LETTERS, SMALLER MARGINS ETC..)

THANKS ALLAH / GOD
AND
THANK YOU FOR THE VIEWING
